

**SYSTEM AND METHOD FOR SELECTIVELY PROVIDING
INFORMATION TO A USER DEVICE**

5

ABSTRACT OF THE DISCLOSURE

A system and method for selectively providing information to a user device includes an event server that provides restricted access to various types of event content information and services related to a particular event.

- 10 A wireless portable user device may provide an access code to the event server at a particular event location through a wireless base station that is coupled to a local area network. A system user may thereby utilize the user device to access the event server for downloading appropriate event content information and related services until the foregoing access code expires.
